

Norwegian Special Mission receives order for three UNIFIS 3000-G2 for the Italian Air Force

Oslo, November 2020

Norwegian Special Mission AS (NSM) has signed a contract with Piaggio Aerospace for delivery of 3x UNIFIS 3000-G2 Flight Inspection Systems and installation support to 4x Piaggio P.180 Avanti Evo+. All 4 aircraft will be delivered to Italian Air force to replace their fleet of existing first generation UNIFIS 3000 systems.

"We are very proud to be selected again as supplier to Italian Ministry of Defence and Piaggio Aerospace" said Dag Langerud, Managing Director at Norwegian Special Mission.

"Our relationship extends to more than 15 years with excellent co-operation, where adaptation of technical solutions tailored to local needs and dedicated support has been the core philosophy."

UNIFIS 3000-G2 is the trade mark of a range of high performance NAVAID's flight inspection tools from NSM. The G2 systems builds on more than 15 years and 50+ delivered systems and enhances the product in all aspects. Innovative console design allows for more flexible multi-mission solutions. The two large touch-screen displays represents a brand new and unique Human Machine Interface at the same time as the ED-109 QA development process is maintained through reuse of proven core software solutions.

NSM is looking forward to serving Italian Air Force into the future with state-of-the-art systems installed in the very capable Piaggio Avanti EVO.

"Large enough to be trusted, small enough to listen"
